The **Affect, Personality and Embodied Brain (APE)** Research Group & network and **Human Neurobehavioural Laboratory (HNL)** are proud to present the APE2021 - an online conference around our understanding of the interaction between the mind and body along the spectrum of normal and atypical behaviours.

KEY NOTE SPEAKERS:

Prof Essi Viding: “*Why should neuroscientists studying psychiatric disorders care about gene-environment correlation?*”

Division of Psychology and Language Sciences, University College London, UK

Prof Michael Berk: “*Can we prevent depression?*”

School of Medicine Deakin University, Australia

Dr Mufti Mahmud “*Applied Informatics for Brain network decoding and disease identification?*”

Department of Computer Sciences, Nottingham Trent University, UK

We have an exciting virtual programme including sessions on:

- Affect, Personality & Psychopathology across the Life-span
- Prevention and Interventions to Mental Health & Wellbeing
- Mood, Food & the Embodied Brain
- Signal Processing and Neuroinformatics
- Workshops: Bayesian stats, How to demonstrate Impact
- Charities & 3rd sector collaborations discussion rounds

Abstract submission deadline **20th August**

We invite you to submit abstracts for posters, oral presentations, workshops and symposia on topics of Affect, Personality and/or Embodied Brain through our conference website.

Culture & Social networking events: At the end of our exciting days, join other delegates for some light entertainment and virtual socialising in our gather towns.
